Modern Castings' 1963 Editorial Index

January-December, Volumes 43-44

New Technology — Market Opportunities — Management for Profit — New Technology — Technology for Profit — Operations for Profit — Vendor Service. In 1963 over 157 individual authors communicated their know-how to the metalcasting industry in more than 900 pages of MODERN CASTINGS feature articles.

AEROSPACE CASTINGS

Castings in Orbit: S. A. McCarthy, Feb., p 37

Premium Strength Aluminum Casting Alloys 354 and 359, R. C. Lemon, C. R. Howle, Sept., p 465

ALLOYING EFFECTS

Control of Structure and Properties of Cast Iron by the Addition of Tin: J. B. Long, D. A. Robbins, June, p 275

Effect of Nickel on Hot Hardness of Aluminum-Silicon Alloys, J. E. Hanafee, Oct., p 514

Effect of Silicon on Cast Properties of an Alpha-Beta Titanium Alloy: R. V. London, H. W. Antes, R. E. Edelman, June, p 285

Factors Affecting Application & Behavior of Magnesium Additives for Ductile Iron . . . D. Matter, H. H. Wilder, R. A. Clark, R. W. White, Dec., p 625

Factors Affecting Fluidity of Zinc Base Die Casting Alloys: V. R. Friebel, W. P. Roe, Aug., p 388

Influence of Silicon on Ductile Cast Iron: Joshua Pelleg, March, p 108

Lead in Gray Cast Iron: Joshua Pelleg, March, p 89

Nickel Effect on Silicon Contaminated Gun Metal Alloys: Leland A. De Pue, William A. Pennington, March, p 81

Nickel in Gray Iron, G. W. Form, J. F. Wallace, Sept., p 54

Optimum Steel Castings Through Computer Design: J. N. Lynch, G. F. Kent, M. P. Berardi, P. J. Montegani. J. Zotos, Aug., p 369

Process Variables in Al-21 Si Alloys Refinement: Yeshwant P. Telang, May, p 232

Some Effects of Copper Additions to Pearlitic Malleable Iron, P. B. Burgess, Sept., p 477

Texture and Roughness of Ground Gray Iron Surfaces: H. D. Merchant, L. I. Davidson, June, p 248

ALUMINUM

Aluminum Casting Research: W. E. Sicha, July, p 319

Dendrite Cell Size: R. E. Spear, May, p 209

Drop-Proof Sand: T. E. Barlow, Feb., p 46

Effect of Nickel on Hot Hardness of Aluminum-Silicon Alloys, J. E. Hanafee, Oct., p 514

Flowing Possibilities of Aluminum in Permanent Molds: Sebastian Feliu and Dionisio Siguin, April, p 145

Free Machining Aluminum Casting Alloys X310 and X335: R. C. Lemon, July p 315

Gating Premium Quality Castings —R. F. Polich, A. Saunders, Jr., M. C. Flemings, Aug., p 418

Gating Tilt Poured Permanent Mold Aluminum Castings: Glenn W. Stahl, May, p 216

Hard Coating of Aluminum, Robert LeMaster, Nov., p 613

Improving Low Temperature Aluminum Casting Properties: D. N. Williams, R. A. Wood, H. R. Ogden, Jan., p 1

Making of Molds for Expandable Polystyrene Beads, James N. Mathias, Oct., p 502

Metal Flow in Aluminum Test Bar Molds by Fluorescent Screen Radiography: W. A. Pollard, June, p 296

Portable Dinky-Cycle Built With Aluminum, Cover Story, Oct., p 147

Premium Strength Aluminum Casting Alloys 354 and 359, R. C. Lemon, C. R. Howle, Sept., p 465

Process Variables in Al-21 Si Alloys Refinement: Yeshwant P. Telang, May, p 232

Some Aspects of Solidification and Structure of Aluminum-Silicon Eutectic Alloys: S. Ghosh, V. Kondic, Feb., p 17

Some Thermal Aspects of Metallic Molds: V. Panchanathan, M. R. Sechadri and A. Ramachandran, April, p 158

AMERICAN FOUNDRYMEN'S SOCIETY

A. B. Sinnett Succeeds W. W. Maloney as General Manager of Society, July p 104

California Apprentice First in Wood Patternmaking, June, p 150

Chapter Officers Attend Conference for Strengthening Society's Ties, Aug., p 115

Dr. Allison Replaces Buchanan as Director, Sept., p 129

How the Apprentice Contest Started Clement J. Freund, Oct., p 56

Howard F. Taylor Award for Outstanding Paper, Oct., p 128

Name National Winners in Apprentice Contest, May, p 170

New AFS Committee Surveying Society, May, p 172

Nominating Group Picks AFS Officers, Directors: Feb., p 117

Pick Nominating Group to Select Candidates, Oct., p 137

Promote Walter Schaw to New AFS Position, Oct., p 128

Society Names Martin C. Dwyer, Inc. To Produce Atlantic City Show, June, p 146

Society Welcomes 48th Chapter With Admission of Penn-York, April, p 213

Technical Council Reviews Progress, Plans Second Yearly Meeting, Aug., p 117

Three Named to Society Posts, April, p 203

Western Michigan Student Chapter Adds to AFS Link with Education, June, p 153

AFS CASTINGS CONGRESS

AFS Officers, May, p 92

Gateway to Progress, June, p 61

Gold Medal Award, May, p 91

Hoyt Lecture: New Tests Lead to More Salable Castings—Walter Sicha, May, p 94

Name Five International Foundrymen for Honors, Feb., p 119

New Technology—Gateway to Progress, May, p 78

Official Program, 67th AFS Castings Congress, May, p 54

67th Castings Congress Highlights, June, p 55

AFS REGIONAL FOUNDRY CONFERENCES

Draw Air-Set Core in Six Minutes — Penn State Foundry Conference, Aug., p 119

East Coast Regional Stresses Efficiency and Cost Reduction, Nov., p 120

Metalcasters Confer in Pasadena, May, p 174

Metalcasters Meet in Birmingham, April, p 210

New England Conference Stresses Metallurgy and Sand Practice, Jan., p 80

New England Metalcasters Focus Attention on Quality Control, Dec., p 116

Purdue Regional Conference Features First Foundry Foremen's Seminar, Jan., p 82

AFS TRAINING & RESEARCH INSTITUTE

Varied Regional Conference Program Helps Michigan Metalcasters, Jan., p 78

Wisconsin Regional Meeting Stresses Education and Practical Know-How, April, p 205

T&RI Reaches Milestone with 100th Course Designed for Metalcasters, Dec., p 110

BRASS, BRONZE & COPPER-BASE

Application of Basic Solidification Phenomena to Mold Design for Copper-base Castings . . . P. K. Trojan, M. J. Weins, R. A. Flinn, Dec., p 656

Bronze Fountains Cast in Air-Set Sands, Aug., p 44

Casting Our Cover, April, p 70

Integrity and Ingenuity . . . Ingredients for Growth . . . : Jack H. Schaum, Jan., p 39

Kiss Gating Brass Castings: C. W. Ward, Jr., T. C. Jacobs, Jan., p 50

Nickel Effect on Silicon Contaminated Gun Metal Alloys: Leland A. De Pue, William A. Pennington, March, p. 81

Perpetual Motion Sand System For High Production, May, p 66

Shell Molded Test Bars for Tin Bronze and Manganese Bronze Casting Alloys; S. Goldspiel, E. W. Chrzan, March, p 102

BUYERS DIRECTORY

Manufacturers and Suppliers for the Metal Castings Industry, April, p BD 49

Sources of Equipment, Services and Supplies, April, p BD 3

CASTING

Art Casting: A. Duca, M. C. Flemings, H. F. Taylor, Jan., p 48

Metallurgical Properties of Continuous Cast Ductile, Gray and High Alloy Iron Bar Stock, W. C. Wick, October, p 544

Multiple Casting of Fuel Pins for Molten Plutonium Reactor Experiment: J. W. Anderson, W. J. Maraman, Aug., p 427

CASTINGS

Castings in Orbit: S. A. McCarthy, Feb., p 37

Gating Premium Quality Castings —R. F. Polich, A. Saunders, Jr., M. C. Flemings, Aug., p 418

Making of Molds for Expandable Polystyrene Beads, James N. Mathias, Oct., p 502

NCR Banks on Ductile Iron, Jan., p 38

119 Warranteed Castings in Chrysler Power-Train, March, p 37

Saddling a Bridge with Castings, March, p 41

$63 Billion Super Highway to Casting Sales, July, p 25

Steel Castings Absorb Impact, D. W. Kern, Nov., p 42

CASTING DEFECTS

Character and Source of the Ceroxide Defect on Steel Castings: W. S. Lyman, F. W. Boulger, C. W. Briggs, July, p 358

Drop-Proof Sand: T. E. Barlow, Feb., p 46

Effect of Oxidation After Solidification on Casting Surface . . Edwin H. Phelps, Nov., p 574

Never on Monday: T. E. Barlow, Jan., p 42

Pinholes In Gray Iron Castings, E. E. Haack, Oct., p 59

Solution to a Nitrogen Porosity Problem in Gray Iron Castings, M. H. Davison, F. P. H. Chen, J. Keverian, Oct., p 528

Steel Foundry Green Facing Sands: George J. Vingas, Arthur H. Zrimsek, Feb., p 50

Stop Steam Reaction with Glycol: E. Brunhuber, Feb., p 47

Terrapaint for Smoother Castings, Sept., p 140

CENTRIFUGAL CASTING

Integrity and Ingenuity . . . Ingredients for Growth . . . : Jack H. Schaum, Jan., p 39

Utilization of Low Frequency Induction Heating for Centrifugally Cast Cylinders: A. M. Ayvazian, March, p 134

CHEMICAL ANALYSIS

Carbon Equivalent by Cooling Curves—a Rapid and Practical Test: Fred E. Kasch, June, p 266

Fuess Spectravist, March, p 127

Spectroscope Tightens Chemical Controls, May, p 74

CLEANING & FINISHING

Abrasive Cleaning at Chevrolet-Tonawanda: Nelson Glanding, July, p 37

Abrasive Tests Reduce Foundry Costs, Dec., p 39

Carborundum Service Lab Helps Metalcasters: Jack H. Schaum, June, p 75

Free Machining Aluminum Casting Alloys X310 and X335: R. C. Lemon, July p 315

New Tumblast Cuts Shot Consumption 84 per cent, May, p 71

Products in Action, Cleaning, April, p 85

Which Cut-Off Wheel? Test For The Best, John E. Koop, Oct., p 51

COMPANY NAME

Accurate Cast Products, Inc.: Making of Molds for Expandable Polystyrene Beads: James N. Mathias, October, p 502

Acme Steel Co.: Mammoth Cupolas Operate Continuously, Dec., p 42

Ajax-Magnethermic Corp.: Rocker Arms Cast from Induction Melted Ductile Iron, May, p 68

Albion Malleable Iron Company: Some Effects of Copper Additions to Pearlitic Malleable Iron, P. B. Burgess, Sept., p 477

Albion Malleable Iron Co.: The Central Control Concept, Dec. p 31

Alcoa Corporation: Premium Strength Aluminum Casting Alloys 354 and 359, R. C. Lemon, C. R. Howle, Sept., p 465

American Radiator & Std. Sanitary Corp.: Kiss Gating Brass Castings: C. W. Ward, Jr., T. C. Jacobs, Jan., p 50

Applied Research Laboratories, Inc.: Spectroscope Tightens Chemical Controls, May, p 74

Archer-Daniels-Midland Fdy. Products Corp.: Four Point Program at A-D-M . . . Serves Metalcasters: Robert F. Dalton, July, p 34

Beardsley & Piper Div. of Pettibone & Mulliken Corp.: Flexible Molding Unit For Short Order Runs, May, p 70

Beloit Foundry Co.; Production of Large Castings In Ductile Iron: H. M. Bacon, Jan., p 55

Bethlehem Steel Company: Saddling a Bridge with Castings, March, p 41

Brillion Iron Works: Recipe for a Summer Evening, Aug., p 43

Brown-Boveri Corp.: Induction Melting Can Be Automatic, May, p 76

Canadian Steel Foundries, Ltd. What Can Be Done About . . . Furan Air Set Cores Carburizing Steel Castings?: M. Notte and G. Greiner, Jan., p 45

Carborundum Company: Carborundum Service Lab Helps Metalcasters: Jack H. Schaum, June, p 75

Chicago Foundry Company: Gas Fired Furnace Produces Ductile Iron, May, p 72

Chrysler Corporation: 119 Warranteed Castings in Chrysler Power-Train, March, p 37

Clearfield Machine Company: Perpetual Motion Sand System For High Production, May, p 66

Farrell-Cheek Steel Co.: Modernizing Foundry Production Planning and Control, Dec., p 671

Hanna Corporation: Hanna Quality Pig Iron Makes Castings Reliable, Robert F. Dalton, Sept., p 48

Hevi-Duty Heating Equipment Company: Flexibility in Analysis — Keynote to Versatility, May, p 62

Hitchiner Manufacturing Co., Inc.: Annealing of Carbon and Low Alloy Steel Castings with Closer Surface Control . . . E. M. Broad, Nov. p 588

International Nickel Company: Partners in Selling . . . Help your customers and you help yourself, Jack H. Schaum, Oct., p 48

Lynchburg Foundry Company . . . dedicated to the pursuit of casting excellence, Oct., p 45

Lynchburg Foundry Co.: Improvements In Production Of Ductile Iron: Harvey E. Henderson, Jan., p 52

Martin-Decker Corp.: Don't Be a Weight Guesser!, May, p 75

Morgan Construction Company . . . Buys Quality Castings . . . Builds Product Integrity: Jack H. Schaum, Feb., p 41

National Castings Company: Steel Castings Absorb Impact . . . D. W. Kern, Nov., p 42

National Gray Iron Foundry Company: Continuous Mulling For Continuous Mold Production, May, p 73

Northern Malleable Iron Company: Welding Malleable Iron, John R. Entenmann, Nov., p 615

Ohio Products Company: Gas Assisted Cupola, Robert F. Dalton, Oct., p 54

Pekay Machine & Engrg. Co., Inc.: Beat the Heat With a Sand Cooler, May, p 69

Prab Conveyors, Inc.: Tube Conveyor Feeds Cast Iron Chips To Cupola Injector, May, p 64

Round-The-Clock Production at Wagner Castings' New Specialty Foundry: Jack H. Schaum, Robert F. Dalton, Aug., p 35

Savannah Machine & Fdy. Co. MCI-Metal Control Inspection — Guarantees Quality Ductile Iron . . . at Savannah Machine & Fdy. Co., Jack H. Schaum, Sept., p 41

Shell Process Company: Robotized Shell Core Production, May, p 65

Symington Wayne Corp.: Continuous Mixer-Slinger for Air Set Core Production, May, p 63

Textile Machine Works: Which Cut-Off Wheel? Test For The Best, John E. Koop, Oct., p 51

Traverse City Iron Works: World's Longest Shell Core?: W. A. Royce, Jr., March, p 42

Wells Manufacturing Company: Metallurgical Properties of Continuous Cast Ductile, Gray and High Alloy Iron Bar Stock, W. C. Wick, Oct., p 544

Westinghouse Electric: Check-List Communicates Casting Needs at Westinghouse Electric; Jack H. Schaum, Aug., p 40

Wheelabrator Corp.: New Tumblast Cuts Shot Consumption 84 per cent, May, p 71

Wisconsin Centrifugal Fdy., Inc.: Integrity and Ingenuity . . . Ingredients for Growth . . . : Jack H. Schaum, Jan., p 39

CORES & COREMAKING

Continuous Mixer-Slinger for Air Set Core Production, May, p 63

Cores But No Castings, Sept., p 53

Effect of Cereal Binders on Room Temperature Properties of Two Core Sands . . . J. B. Caine, W. C. Hudson, C. G. Fortney, Dec., p 641

Loading Rate Effect on Tensile and Compressive Strengths of Various Binders: Matt Granlund and Gerry Noren, April, p 167

Method for Testing No-Bake Foundry Sand Binders: Wayne H. Buell, March, p 97

Products in Action, Molding and Coremaking, April, p 79

Robotized Shell Core Production, May, p 65

Terrapaint for Smoother Castings, Sept., p 140

COSTS

Abrasive Cleaning at Chevrolet-Tonawanda: Nelson Glanding, July, p 37

Abrasive Tests Reduce Foundry Costs, Dec., p 39

GPD Latest Development of the MTM Association: Roger L. Yard, Sr., May, p 226

How to Modernize Jobbing Foundries for Profitability: H. E. Fellows, March, p 47

Supervisory Incentives: S. Donald Sanders, June, p 241

Which Cut-Off Wheel? Test For The Best, John E. Koop, Oct., p 51

COVER STORIES

Bronze Fountains Cast in Air-Set Sands, Aug., p 44

Casting Our Cover, April, p 70

Castings for Cordless Electric Drill, June, p 152

Intricate 241 Lb. Gray Iron Casting for Loom, Sept., p 130

Morgan Construction Company . . . Buys Quality Castings . . . Builds Product Integrity: Jack H. Schaum, Feb., p 41

NCR Banks on Ductile Iron, Jan., p 38

Portable Dinky-Cycle Built With Aluminum, Oct., p 147

Saddling a Bridge With Castings, March, p 41

Six Million Btu Boiler Built With Cast Iron Sections . . . Dec, p 130

Steel Castings Absorb Impact: D. W. Kern . . . Nov., p 42

CUPOLA

Gas Assisted Cupola, Robert F. Dalton, Oct., p 54

Mammoth Cupolas Operate Continuously . . . R. F. Dalton, Dec., p 42

Thermochemical Model for Computer Prediction of Cupola Performance . . . Robert D. Pehlke, Nov., p 580

Tube Conveyor Feeds Cast Iron Chips To Cupola Injector, May, p 64

DESIGN

Castings in Orbit: S. A. McCarthy, Feb., p 37

Metal Flow in Aluminum Test Bar Molds by Fluorescent Screen Radiography: W. A. Pollard, June, p 296

Steel Castings Absorb Impact: D. W. Kern, Nov., p 42

Welding Malleable Iron . . . John R. Entenmann, Nov., p 615

DIE CASTING

Die Casting Operator Training: H. E. Eriksen, Aug., p 45

Factors Affecting Fluidity of Zinc Base Die Casting Alloys: V. R. Friebel, W. P. Roe, Aug., p 388

Gating of Die Castings: W. E. Smith, J. F. Wallace, July, p 325

The Metal Zinc: C. K. Conard, May, p 221

Progress in Zinc Base Die Casting Alloys: Donald L. Colwell, April, p 172

Water Analogy Study of Fluid Flow in the Cold Chamber: N. Sheptak, July, p 349

DUCTILE (NODULAR) IRON

Application of Sandwich Method to Produce Ductile Iron . . . R. W. White, Dec., p 628

Control of Structure and Properties of Cast Iron by the Addition of Tin: J. B. Long, D. A. Robbins, June, p 275

Ductile Iron Magnified 6760 Times: Carl R. Loper, Jan., p 53

Effect of Heat Treatment on Impact Properties of Ductile Iron: C. Vishnevsky, J. F. Wallace, June, p 290

Effect of Oxidation After Solidification on Casting Surface . . . Edwin H. Phelps, Nov., p 574

European Ductile Iron Practice: W. Heinrichs, Jan., p 56

Experiences With Plunging, Open Ladle and Sandwich Methods . . . Ralph Carlson, Dec., p 638

Factors Affecting Application and Behavior of Magnesium Additives for Ductile Iron . . . D. Matter, H. H. Wilder, R. A. Clark, R. W. White, Dec., p 625

Improvements in Production of Ductile Iron: Harvey E. Henderson, Jan., p 52

Influence of Silicon on Ductile Cast Iron: Joshua Pelleg, March, p 108

Injection of Magnesium Metal . . . William H. Dawson, Dec., p 632

Inverse Chill in Ductile Iron: R. J. Christ, M. J. O'Brien, Feb., p 75

Lynchburg Foundry Company . . . dedicated to the pursuit of casting excellence, Jack H. Schaum, Oct., p 45

MCI-Metal Control Inspection — Guarantees Quality Ductile Iron . . . at Savannah Machine & Fdy. Co., Sept., p 41, Jack H. Schaum

Mammoth Swedish Induction Furnace Handles 66,000 Pounds of Iron: Harry Eriksson, July, p 31

Metallurgical Properties of Continuous Cast Ductile, Gray and High Alloy Iron Bar Stock, W. C. Wick, Oct., p 544

NCR Banks on Ductile Iron, Jan., p 38

Partners in Selling . . . Help your customers and you help yourself, Jack H. Schaum, Oct., p 48

Production of Large Castings In Ductile Iron: H. M. Bacon, Jan., p 55

Quantitative Metallographic Evaluations of Graphitic Microstructures: L. L. Wyman and G. A. Moore, Jan., p 7

Rocker Arms Cast from Induction Melted Ductile Iron, May, p 68

Round-The-Clock Production At Wagner Castings' New Specialty Foundry: J. H. Shaum, Robert F. Dalton, Aug., p 35

Special Ladle for Ductile Iron: W. W. Levi, Jan., p 57

EDUCATION

Cores But No Castings, Sep., p 53

Die Casting Operator Training: H. E. Eriksen, August, p 45

Emphasize Materials Engineering at Foundry Educational Meeting, June, p 148

How the Apprentice Contest Started, Clement J. Freund, Oct., p 56

How to Goof-Up a Meeting: Ralph E. Betterley, March, p 44

Programmed Foundry Training Course . . . T. E. Barlow, Nov., p 44

Utilization of Government Prorams in Training Foundry Personnel, Francis A. Gregory, Sep., p 481

FURAN BINDERS

Continuous Mixer-Slinger for Air Set Core Production, May, p 63

What Can Be Done About . . . Furan Air Set Cores Carburizing Steel Castings?: M. Notte and G. Greiner, Jan., p 45

FURNACES

Flexibility in Analysis — Keynote

to Versatility, May, p 62
Gas Fired Furnace Produces Ductile Iron, May, p 72
Induction Melting Can Be Automatic, May, p 76
Mammoth Swedish Induction Furnace Handles 66,000 Pounds of Iron: Harry Eriksson, July, p 31
Rocker Arms Cast from Induction Melted Ductile Iron, May, p 68
60,000-Degree Melting Furnace, Aug., p 126

GATING & RISERING

Application of Moldable Exothermic Materials to Steel Castings . . . J. E. Gotheridge, J. Morgan, R. W. Ruddle, Nov.,p 561
Exothermic Padding Use on Steel Castings . . . R. J. Murphy, R. D. Low, A. G. Linley, Dec., p 684
Flowing Possibilities of Aluminum in Permanent Molds: Sebastian Feliu and Dionisio Siguin, April, p 145
Gating of Die Castings: W. E. Smith, J. F. Wallace, July, p 325
Gating Premium Quality Castings — R. F. Polich, A. Saunders, Jr., M. C. Flemings, Aug., p 418
Gating Tilt Poured Permanent Mold Aluminum Castings: Glenn W. Stahl, May, p 216
Kiss Gating Brass Castings: C. W. Ward, Jr., T. C. Jacobs, Jan., p 50
Metal Flow in Aluminum Test Bar Molds by Fluorescent Screen Radiography: W. A. Pollard, June, p 296
Two Interrelated Factors Influencing Nonmetallics and Misruns in Iron and Steel Castings: J. B. Caine, E. H. King, J. S. Schumacher, May, p 193
Vacuum Degassing & Feeding of Carbon Steel Castings, D. E. Parsons, Sept., p 433
Water Analogy Study of Fluid Flow in the Cold Chamber: N. Sheptak, July, p 349

GRAY IRON

Carbon Equivalent by Cooling Curves — a Rapid and Practical Test: Fred E. Kasch, June, p 266
Control of Structure and Properties of Cast Iron by the Addition of Tin: J. B. Long, D. A. Robbins, June, p 275
Flexibility in Analysis — Keynote to Versatility, May, p 62
Inoculoy 63, Feb., p 130
Intricate 241-Lb. Gray Iron Casting for loom, Sept., p 130
Lead in Gray Cast Iron: Joshua Pelleg, March, p 89
Lynchburg Foundry Company . . . dedicated to the pursuit of casting excellence, Jack H. Schaum, Oct., p 45
Mammoth Swedish Induction Furnace Handles 66,000 Pounds of Iron: Harry Eriksson, July, p 31
Metallurgical Properties of Continuous Cast Ductile, Gray and High Alloy Iron Bar Stock, W. C. Wick, Oct., p 544
Mold Cavity Enlargement in Gray Iron Castings as Controlled by Green Sand Mold Additives: L. I. Toriello, J. F. Wallace, Aug., p 404
Nickel In Gray Iron, G. W. Form, J. F. Wallace, Sept., p 54
Partners in Selling . . . Help your customers and you help yourself, Jack H. Schaum, Oct., p 48
Pinholes in Gray Iron Castings, E. E. Haack, Oct., p 59
Quantitative Metallographic Evaluations of Graphitic Microstructures: L. L. Wyman and G. A. Moore, Jan., p 7
Six Million Btu Boiler Built With Cast Iron Sections, Dec., p 130
Solution to a Nitrogen Porosity Problem in Gray Iron Castings, M. H. Davison, F. P. H. Chen, J. Keverian, Oct., p 528
Strength of Surface Films on Liquid Cast Iron and an Analysis of Their Effect on Flow Into Thin Sections . . . T. R. Baruch, G. W. P. Rengstorff, Nov., p 595
Texture and Roughness of Ground Gray Iron Surfaces: H. D. Merchant, L. I. Davidson, June, p 248
Tube Conveyor Feeds Cast Iron Chips To Cupola Injector, May, p 64
Two Interrelated Factors Influencing Nonmetallics and Misruns in Iron and Steel Castings: J. B. Caine, E. H. King, J. S. Schumacher, May, p 193
World's Longest Shell Core?: W. A. Royce, Jr., March, p 42

HEAT TREATING

Annealing of Carbon and Low Alloy Steel Castings with Closer Surface Control . . . E. M. Broad, Nov., p 588
Cast Maraging Steel: E. P. Sadowski, R. F. Decker, Feb., p 26
Controlled Atmosphere Heat Treatment of Steel Castings . . . S. L. Fredericks, Dec., p 653
Effect of Heat Treatment on Impact Properties of Ductile Iron: C. Vishnevsky, J. F. Wallace, June, p 290
Influence of Silicon on Ductile Cast Iron: Joshua Pelleg, March, p 108
Upgrading Steel Casting Quality and Atmosphere Control by Using Short Cycles, R. J. Light, Oct., p 497
Utilization of Low Frequency Induction Heating for Centrifugally Cast Cylinders: A. M. Ayvazian, March, p 134

INTERNATIONAL FOUNDRY CONGRESS

ICFTA Plans for 1963 International, Feb., p 118
International Honors For Flemings, Sept., p 47
Notes on the International Foundry Conference "IFC" . . . James S. Vanick, Nov., p 50
Plan Two European Tours Ending in Amsterdam for International, Dec., p 114

INVESTMENT CASTING

Annealing of Carbon and Low Alloy Steel Castings with Closer Surface Control . . . E. M. Broad, Nov., p 588
Gating Premium Quality Castings, R. F. Polich, A. Saunders, Jr., M. C. Flemings, Aug., p 418

MAGNESIUM

Castings in Orbit: S. A. McCarthy, Feb., p 37

MAINTENANCE

The Central Control Concept . . . K. S. King, Dec., p 31
Polyurethanes — What are They? Richard A. Garrett, Sept., p 51

MALLEABLE IRON

Albion Malleable Iron Co. . . . Creates Marketing Division For Competitive Competence: Jack H. Schaum, March, p 38
The Central Control Concept . . . K. S. King, Dec., p 31
Quantitative Metallographic Evaluations of Graphitic Microstructures: L. L. Wyman and G. A. Moore, Jan., p 7
Some Effects of Copper Additions to Pearlitic Malleable Iron, P. B. Burgess, Sept., p 477
Welding Malleable Iron . . . Howard Cary, Nov., p 620
Welding Malleable Iron . . . John R. Entenmann, Nov., p 615

MANAGEMENT

A Logical Approach to Injury Reduction, K. T. Johnstone, Oct., p 556
Albion Malleable Iron Co. . . . Creates Marketing Division For Competitive Competence: Jack H. Schaum, March, p 38
Can Vendors Speed — What Metalcasters Need?, May, p 89
Carborundum Service Lab Helps Metalcasters: Jack H. Schaum, June, p 75
The Central Control Concept . . . K. S. King, Dec., p 31
Die Casting Operator Training: H. E. Eriksen, Aug., p 45
Four Point Program at A-D-M . . . Serves Metalcasters: Robert F. Dalton, July p 34
Guaranteed Castings — Industry's Newest Selling Tool, Jan., p 31
How to Goof-Up a Meeting: Ralph E. Betterley, March, p 44
How to Modernize Jobbing Foundries for Profitability: H. E. Fellows, March, p 47
Industrial Waste Treatment in The Foundry Industry, Sept., p 471
Integrity and Ingenuity . . . Ingredients for Growth . . . : Jack H. Schaum, Jan., p 39
Let's Make More Money! Sept., p 44
Lynchburg Foundry Company . . . dedicated to the pursuit of casting excellence, Jack H. Schaum, Oct., p 45
Metalcasters Participate in "Cloud 9" Forum, May, p 86
Missionary and Maintenance Selling . . . A Plan for Profitable Growth in the Castings Industry: George N. Kahn, June, p 72
Modernizing Foundry Production Planning and Control . . . Karl T.

Rinderle, Dec., p 671
Morgan Construction Company . . . Buys Quality Castings . . . Builds Product Integrity: Jack H. Schaum, Feb., p 41
Partners in Selling . . . Help your customers and you help yourself, Jack H. Schaum, Oct., p 48
Profitability . . . the Eternal Quest, Nov., p 39
Ready . . . Aim . . . Fire: Robert F. Dalton, June, p 78
Recipe for a Summer Evening, Aug., p 43
Round-The-Clock Production At Wagner Castings' New Specialty Foundry: Jack H. Schaum, Robert F. Dalton, Aug., p 35
$63 Billion Super Highway to Casting Sales, July, p 25
Supervisory Incentives: S. Donald Sanders, June, p 241
Trends Panel Highlights Quality Control, Dec., p 35
Utilization of Government Programs in Training Foundry Personnel, F. A. Gregory, Sept., p 481
Vendors Anticipate a Busy '63, Jan., p 43

MARKET OPPORTUNITIES

Albion Malleable Iron Co. . . . Creates Marketing Division For Competitive Competence: Jack H. Schaum, March, p 38
Check-List Communicates Casting Needs at Westinghouse Electric: Jack H. Schaum, Aug., p 40
GPD Latest Development of the MTM Association: Roger L. Yard, Sr., May, p 226

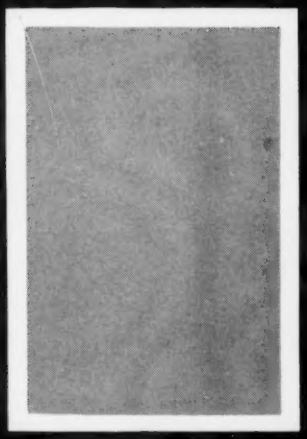
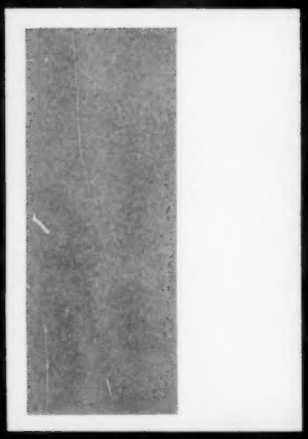
one of a series:





modern castings publishes nearly twice as much feature editorial material as any other publication in the metal castings field:

20 MONTH PERIOD: JAN. 1962 THRU AUG. 1963

modern castings 1507 pages
publication "F" . . . 809 pages

WRITE TODAY FOR A MODERN CASTINGS MARKET/MEDIA FILE.

THERE IS AT LEAST ONE **modern castings** READER IN EVERY CASTING PLANT IN THE $6½ BILLION METAL CASTINGS MARKET
